EDUCATION

- **University of Waterloo** Waterloo, ON, Canada
First Year Master of Computer Engineering May. 2026 – Dec. 2027
- **University of Victoria** Victoria, BC, Canada
*B.Sc of Computer Engineering, **Specializations:** Computer Intelligence/Network and Security* Sep. 2020 – May. 2025

EXPERIENCE

- **Kuran Games** Beijing, China
Software Engineer Intern July 2025 – Sept 2025
 - **Game Development:** Built multiple unique H5 games from design to completion using AI-assisted workflows.
 - **Optimization:** Deep-dived game performance bottlenecks and solved efficiency issues with AI-assisted debugging.
 - **Prod Support:** Resolved 30+ client tickets for products using AI to perform root-cause analysis and debugging.
 - **CI/CD:** Completed 5+ production releases while increasing integration test coverage by 10%.
- **Natural Resources Canada** Victoria, BC
Data Analyst Intern Sept 2024 – Apr 2025
 - **Feature Development:** Delivered software features from design and stakeholder review to production release.
 - **ArcGIS Automation:** Leveraged Python libraries within ArcGIS to automate meaningful data visualizations.
 - **Algorithm Optimization:** Improved wildfire spread project performance by 15% using level BFS algorithms.
 - **Data Processing:** Processed hundreds of thousands of records using Python scripts and SQL queries.
- **Noratek Solutions** Prince George, BC
Software Engineer Intern May 2024 – Aug 2024
 - **Java Development:** Created and troubleshoot a pivot table system in Java to display customized client data.
 - **Testing:** Introduced robust unit testing achieving over 90% coverage for critical functionality.
 - **System Design:** Worked with senior engineers to design isolated modules for application workflows.
 - **Database Development:** Wrote SQL queries combining PostgreSQL data for client-facing dashboards.
- **Voronoi Health Analytics** Vancouver, BC
Software Developer Intern Jan 2022 – Apr 2022 & Sept 2022 – Dec 2022
 - **Automation:** Developed a C++ startup script supporting machine specific dynamic inputs to start anywhere.
 - **Interprocess Communication:** Connected MATLAB and C++ processes using named pipes and JSON strings.
 - **Platform Development:** Improved company Bash scripts making them generalizable across operating systems.
 - **Testing Tools:** Developed a C++ program that generated mock user data for application testing.

PROJECTS

- **Face Tracking Security Camera:** Used OpenCV and NumPy to extract image frame features, optimized multithreading for CPU performance, and integrated email notifications with attached image payloads.
- **Machine Learning Thermal Rescue Drone:** Developed and trained a YOLOv8 object detection model achieving 85%+ accuracy for human detection and deployed it on a drone running real-time inference at 15 FPS.
- **Computer Vision CNN Penguin Segmentation:** Implemented image segmentation using keypoints, Gaussian filters, CNN models, affine transformations, and GPU-accelerated YOLOv8 classification.

PROGRAMMING SKILLS

- **Languages:** Python, JavaScript, C++, Java, SQL, Swift
- **Technologies:** Git, Linux, VS Code, IntelliJ, Cursor, Next.js, Xcode PyTorch,
